Houses of worship

Christie®, the undisputed leader in multi-window processing, is again setting the standard with the all-new Christie Spyder X80. Create spectacular experiences with unprecedented 80 megapixel processing power in true 4K@60Hz across multiple displays. As the next-generation Spyder – the tool trusted by professionals for the most demanding applications – the Christie Spyder X80 enables the creation of spectacular, never-before-seen visual experiences.

CHRISTIE®

Christie Spyder X80

Featuring processing and connectivity capabilities that surpass anything else in the market, the Spyder X80 is the most powerful multi-screen windowing processor and content management solution available. Engineered with direct feedback from users, the Spyder X80 is built specifically for applications requiring a massive volume of pixels from source to display with the highest level of performance, flexibility and functionality possible.

Features

- › Single-cable 4K@60Hz support on every channel
- › Multiple sources and displays
- › Super-fast still loading for backgrounds and as source content
- › User-defined color bit depth. 80 megapixel bandwidth at 8 bit and 53 megapixel at 12 bit
- › Extremely low latency with powerful universal switching built-in, cross point hardware for fast switching and maximum input/output routing capability with no additional signal latency
- › Redundant hot swappable power supplies
- › Spyder Studio client software allows offline editing to configure and program without the need of hardware
- › Christie® Widget Designer integration to create dedicated user interfaces and interaction logic to easily manage installations
- › Customizable multi-viewer output(s) arranges sources, display areas, program and preview for real-time monitoring
- › Intelligent EDID Manager with custom creation of user-defined resolutions, ensures adaptability across intuitive graphical user interface (GUI)

Functionality

- › Seamless management of multiple SD, HD, 4K and stereoscopic workflows simultaneously
- › External matrix switching supports a wide range of manufacturers
- › Built-in conversion for interlaced signals, resolutions, aspect ratio and refresh rates
- › User-defined edge blending and tiling
- › Window border and drop shadow creation with adjustable color, width, softness, shadow offset and transparency
- › Online editing mode to preset scenes to be built and edited in preview mode without affecting what the audience is seeing
- › Advanced auto-sync functionality
- › External control support of the optional Christie Montage II console, Shot Boxes, and other third-party controllers and interfaces

› Bitmap borders

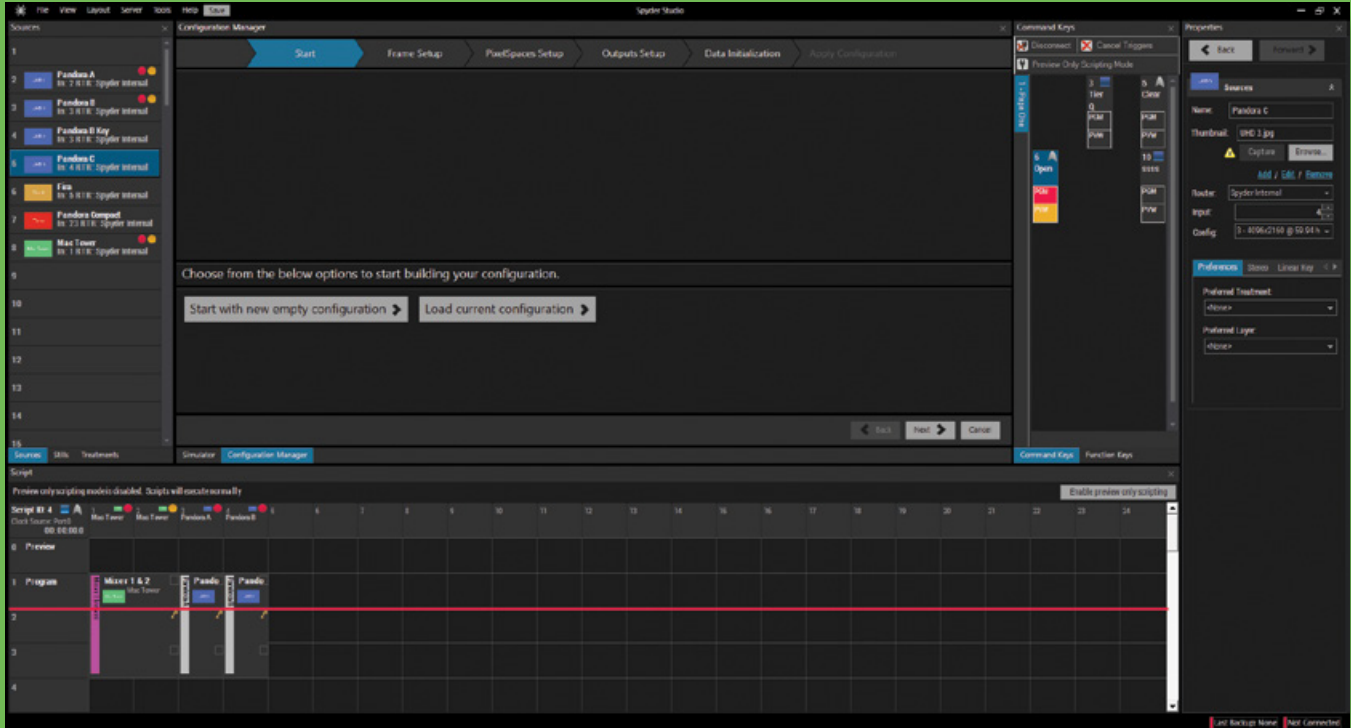

Connectivity

- › Flexible, scalable and customizable I/O configurations with card slot design
- › Each channel = 4K support reducing the need for additional channels and cables
- › Universal input/output capabilities - mix and match multiple formats with single point processing
- › Manages and displays multiple 3D and 2D sources simultaneously (with optional stereoscopic license)
- › Each output individually supports rotation - enabling the creation of vertically-orientated display
- › HDCP 2.2 support for compliance with latest in digital copy protection
- › Every input = HDMI 2.0, DisplayPort 1.2 and 12 G-SDI connections

Industrial design color LCD display

- › Status and display design
- › Smart keyboard functionality, programmable to recall test patterns and diagnostics and more
- › Thumbnail video display keys
- › Context sensitive, programmable
- › User configurable
- › A web browser can be used to show status and logs, upload new firmware, trigger presets, and more²

MST support on DisplayPort outputs³

Easily and simply expand any 4K output into as many as 4x individual HD streams.
Uses off-the-shelf MST technology.

Graphic user interface/client software

Single control point for all processing and signal distribution functions from PC client software via Ethernet, or external control system.

Spyder Studio is a Windows-based, client software (GUI) interface that makes it easy to configure and control the Spyder X80 in real time. From simple presets to complex frame-accurate timelines, Spyder Studio has the flexibility and functionality required for the most demanding live environments. Spyder Studio can be used off-line allowing the user to completely configure and program the X80 conveniently without hardware present. Backup and restore files allow configuration and programming protection along with easily repeating future configurations.

^{1,3} Future release. ² Not a replacement of the client software.

Technical specifications

Inputs	number	Up to 6 input modules each with 4 inputs User may define the amount of modules required from 1 to 6
	signals	Each input supports 3 connections DisplayPort 1.2 • HDMI 2.0 • 12G-SDI
	resolutions	Horizontal up to 4096 and vertical up to 2400 within pixel clock
	scan rates	Up to 120Hz dependant on pixel clock rate maximum
	bit depth	Support for 8/10/12
	frame lock	Via a dedicated BNC. Passive black burst loop or tri level signals
	Outputs	number
signals		Each output supports 3 connections DisplayPort 1.2 • HDMI 2.0 • 12G-SDI
resolutions		Horizontal up to 4096 and vertical up to 2400 within pixel clock
scan rates		Up to 120Hz dependent on pixel clock rate maximum
bit depth		Support for 8/10/12
Control and networking		RS-232 in/out Ethernet (10/100/1000)
Accessories	standard	User manual (USB drive) • 4 AC power cords Christie Spyder Studio software • Rack hardware
	optional	Dust filters
Enhanced features	Independent aspect ratio and frame rate setup • Overlays Transitions • Aspect ratio conversions • Integrated source monitoring Output rotation (portrait) • Optional stereoscopic support ¹ HDCP support • 2D and 3D capabilities	
Power requirements (fully loaded)	operating voltage	90-264 VAC @ 50/60Hz
	operating current	14A max
	power	1680W
Physical	space required	6RU
	size	(LxWxH): 23.54 x 17.36 x 10.28" (598 x 441 x 261mm)
	shipping size	(LxWxH): 30.94 x 23 x 16.3" (786 x 584 x 414mm)
	weight	79.75lbs (36.17kg) - fully loaded
	shipping weight	109.1lbs (49.49kg) - fully loaded
Operating environment	Temperature: 40-95°F (5-35°C) Humidity: 20-80% non-condensing	
Warranty	Two years parts and labor Contact an authorized Christie representative for full details of our limited warranty
