About us

publitec, based in Dortmund, has been your established distributor for professional image and video technology since 2000. In recent years, we have expanded our range to include lighting technology, sound equipment, rigging solutions, and various accessories. We are now reseller of many well-known and renowned manufacturers from all over the world. As a reliable partner for specialist dealers, system integrators, and event technology service providers, we aim to be your all-encompassing one-stop solution.

In this catalogue, we present a selection of manufacturers and highlight products. Please note that this is a general overview with a small selection of products. If you're interested in a specific projector, have a particular light in mind, or are unsure about choosing the right PA system, feel free to contact us, and we will find a customized solution for you! Optionally also with dry hire equipment from our partner NicLen.

We look forward to hearing from you!

Your **publitec** team

Specialist in LED solutions, Absen offers flexible and user-friendly materials for any event. We provide their full portfolio, ensuring the best price-performance ratio.

Popular products include the Polaris 3.9 Pro V2 for outdoor use, Polaris 2.5 Plus V2 and Aries 1.5 Pro for indoor applications, ideal for delivering detailed, brilliant images at exhibitions. The Polaris series LED walls are concave and convex curveable, with an advanced auto-lock magnetic system for easy setup and takedown.

Known for their robustness, Absen products are a staple in NicLen's rental fleet.

AV Stumpfl®: The Austrian manufacturer has been producing premium components for live events and video installations for over 40 years. Their expertise lies in mobile and fixed projection screens. We can offer you the perfect AV Stumpfl® screen, be it for a conference room or the big stage at a business event.

Looking for a frameless screen with a sleek design that appears to float in space? Or a mobile screen for large projections that's easy to set up? Whether you need Vario®, MonoClip®, DECOFRAME, INLINE, or AnyShape, we've got you covered.

The Dutch AV specialist Audipack has been setting standards for innovative audio and video mounting solutions since 1982. You can purchase everything from their portfolio through us. Selected products are available directly from our warehouse, ensuring fast deliveries.

Among other things, Audipack produces floor stands with stylish designs, space-saving and elegant flat panel solutions, and easily adjustable projector mounts. Particularly useful are the projector outdoor housings, which make your devices optimally wind- and weatherproof.

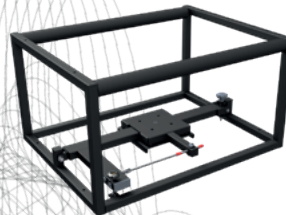

We can also supply you with custom flight cases, interpreter booths, motorized lift systems, and all kinds of accessories to mount any device – from speaker boxes to flat screens and projectors. We offer everything from Audipack's over 200-page catalog!

P5343

PCL-5050-3

The Belgian manufacturer Barco has been developing revolutionary video technology for events and conferences for decades.

4K laser projectors up to 45,000 lumens such as the QDX-4K45 (as a laser phosphor or RGB laser version) or the I600-4K15 can be found here. We also offer versatile image processing solutions such as the ImagePRO-4K or PDS-4K, with which you will always be prepared for all eventualities.

I600-4K15

QDX-4K45

CHRISTIE®

The projectors from the Canadian manufacturer CHRISTIE® are not only world market leaders in the field of digital cinema, but also popular in the sector of event technology.

Three top models that you can buy from us are the 3DLP laser projectors Griffyn 4K35 RGB and M 4K15 RGB as well as the 1DLP laser projector DWU1800-JS. With Pandoras Box®, CHRISTIE® also has a very convincing media server system.

When it comes to the professional presentation of information for talks at trade fairs or conferences, the systems from AV specialist Interspace Industries are the right choice. The British manufacturer's product portfolio includes cueing, timing and presenter systems as well as audio balancing boxes and many other innovative solutions.

The cueing systems are particularly popular among event technology users. These include, for example, the MasterCue V7 and V6 systems or the MicroCue² and MicroCue³ systems for simpler presentation set-ups. Several devices can be controlled in simultaneously using a handheld transmitter.

Timing systems for visual control of the presentation duration are also popular and proven. The Countdown Touch, for example, was specially developed for coordinating the timing of speakers in large conferences.

TheatreCue

matrox®

— video —

With Matrox's extensive product range, there's nothing left to be desired when it comes to video networking technology. Since 1976, the Canadian company has been virtually synonymous with innovative technology.

The Matrox product portfolio includes encoders, decoders, converters and gateways, IP KVM extenders, video wall processors and controllers, as well as broadcast developer products. In other words, plenty of essential tools for your setup.

Particularly noteworthy is the ConvertIP series, which makes it easy to configure a variety of signals into an IP network. Video over IP, ideal for modern broadcast and event environments. When it comes to configuring video walls, the QuadHead2Go series of multi-monitor controllers is the optimal choice. Another highlight is the Avio N2150, a user-friendly IP KVM extender for high-performance video applications.

AVIO N2150

ConvertIP Series

QuadHead2Go Series

NovaStar is a leading manufacturer of LED control systems whose technology has already been used at the Olympic Games in Beijing and Rio, among others. From live events to digital signage, NovaStar offers solutions such as synchronised control, point-to-point calibration and cloud-based management services.

The Armor receiving cards, especially the powerful A10S Pro, are particularly noteworthy. The LED controllers in the MX and MCTRL series offer a wide range of options for every application. For further NovaStar products, please do not hesitate to contact us.

MCTRL660 Pro

MX20

MX40 Pro

Panasonic

When it comes to event technology, you can hardly avoid a Panasonic projector or PTZ camera.

We also offer the entire product range, and when it comes to PTZ cameras, the Panasonic AW UE160 is a real recommendation. It enables low-noise images in any environment thanks to its very light-sensitive 4K sensor. Furthermore, it has an integrated optical low-pass filter and ultra-fast phase detection autofocus. This makes it the best choice for particularly dynamic events where a lot happens very in a short period of time.

When it comes to investing in a Panasonic projector, the LCD laser projector PT-MZ882 and the 1DLP projector PT-RZ120 are particularly recommended. The Panasonic range is rounded off by 43' to 98' 4K displays.

PEGASUS

RIG TOOLS

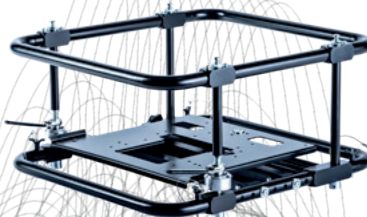

When you work with projectors, stacking, rigging and general handling should be as simple as possible. Our pegasus projector frames are irreplaceable helpers in daily event use.

They feature an infinitely adjustable centre of gravity, a removable crossbar for short-distance lenses and are 100% compatible with Panasonic and Rigtec frames.

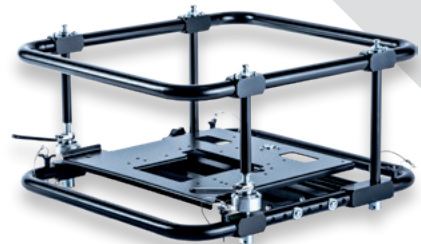

The pegasus ng large projector frame fits perfectly for 3DLP projectors from Panasonic and the HS series from CHRISTIE®. Panasonic's 1DLP projectors are compatible with a pegasus ng medium frame. And a pegasus ng medium Extra is ideal for the Epson EB-PU2220B.

The logo for PIXERA, featuring a stylized yellow triangle to the left of the word "PIXERA" in a bold, black, sans-serif font.

PIXERA is AV Stumpfl®'s media server division for the implementation of video installations in the live event, film or theatre industry. Just like the screen systems, PIXERA is very successful, has won several awards and is increasingly becoming the new standard.

The media server system is powerful, intuitive to use and cost-effective. This means that you can easily realise larger applications with PIXERA media servers, but also have a really suitable set-up at hand for smaller events. We offer everything from ultra-compact mini servers to high-performance models for demanding real-time graphics applications.

SHARP / NEC

Sharp NEC Display Solutions Europe GmbH is a renowned manufacturer in the field of LCD and LED displays. The models in the MultiSync® series are particularly noteworthy. They are suitable for the lifestyle and entertainment sector as well as business applications, making them ideal for the world of event technology.

We can particularly recommend the M-Series, ME-Series and E-Series models. The UHD LCD displays are extremely robust, slim and elegantly designed and can be used in 24/7 continuous operation, which qualifies them for a variety of special applications.

Possible locations include museums, hotels and retail. They can also be used for digital signage applications. For a practical installation, the displays come with handles on the back.

MultiSync® E-Series

MultiSync® M-Series

MultiSync® ME-Series

Live events, film, theatre, installations – DPA microphones are praised worldwide for their reliability, clear sound, technical finesse, and many other advantages. The revolutionary CORE+ technology eliminates component-based distortions in every microphone it is integrated into, delivering even better sound quality. Any residual noise is virtually no longer even measurable.

Thanks to many decades of experience in development, the Danish manufacturer can offer world class solutions in every product category. From flexible gooseneck microphones for environments with challenging acoustics to discreet lavalier microphones and handheld microphones for stage performances.

DPA microphones have already proven themselves during the Apollo 13 mission and captured the sound of falling snowflakes in the Antarctic. Time to make them part of your setup too!

4099-DC-1-101-CM

Gravity® is the Adam Hall Group's brand for robust stands and mounts. The reliable accessories ensure that nothing gets out of place at your event.

Through close dialogue with musicians and stage technicians, Gravity® develops innovative products for use on tour or in studios. The products cover a broad spectrum. There are stands for microphones, speakers, lighting technology, instruments, tablets and much more.

Each product contains one or two features that make it particularly practical to use. The stands also have a long lifespan, an elegant design and are made from extremely robust components.

TLS 431 B

TMS 4332 B

LD Systems® is an Adam Hall Group brand for anyone who is addicted to good sound. The manufacturer develops sound technology that offers high performance, quality and optimum sound. Moreover, the products have already won several design awards.

The sound solutions are tailored to the event & touring sector, but there is also a lot of technology especially for DJs, bands, singer-songwriters etc. System integrators are also ideally served.

LD Systems® currently offers over 30 different product series. These include the very flexibly configurable MAILA line array system, which enables ground stacking and flown setups with up to 8 satellites. Or the MAUI column systems, which reach everyone at your event with a very wide horizontal dispersion angle of 120°. Another highlight is the battery-powered Bluetooth speaker Roadbuddy 10.

MAILA®

Roadbuddy 10

MAUI®

PKSOUND™

The Canadian manufacturer PK Sound has revolutionized large-scale event sound systems. Thanks to their patented Multi-Axis Robotics Technology, line arrays can now be adjusted remotely with millimeter precision. The company is thus leading the next generation of live sound.

The T8 and T10 line-source elements can be adjusted horizontally between 60°-120° and vertically in precise 0.1° steps from 0°-12°. The line array can thus be adapted to any requirement, avoiding obstacles and preventing noise pollution. When it comes to sound quality, PK Sound is undoubtedly in the top league.

The manufacturer's philosophy: The leanest possible product range for the widest possible spectrum of applications. In addition to the two line-source elements, the portfolio includes two subwoofers, two point-source speakers and control technology.

T8

T10

optimic is the AI upgrade for the field of sound engineering. And the name says it all: The flagship product from the Hamburg-based manufacturer – the optimic – automatically enhances speech signals in any environment and uses AI to remove background noise and room reverberation. The result is always perfectly balanced sound, even under challenging acoustic conditions.

Behind optimic are musicians, speakers, and sound engineers who are all too familiar with the challenging sound conditions at many venues. That is how the idea was born to create a compact and highly effective device that optimizes sound in real time.

Independent of microphones or PA systems, the optimic removes background noise, evens out volume differences, makes every voice sound clearer through sound optimization, and suppresses feedback. This is the optimic effect!

Optimic

SENNHEISER

AUDIO

Tradition and innovation have characterised Sennheiser for over 75 years. The family-run company inspires with pioneering technologies such as the new Spectera system, a global novelty in digital wireless audio transmission.

For live productions, the EW-DX microphone system also impresses with its seamless integration, high dynamic range and low latency. Sennheiser also offers a wide range of microphones, headphones and conference systems.

Spectera

EW-DX

SHURE

Shure, a brand with almost 100 years of success, shapes sound technology worldwide. From the GRAMMYS® to the Olympic Games, from Elvis to Martin Luther King Jr. - everyone has worked with Shure technology. As a reseller, we offer you the suitable equipment for every need.

Microflex® Wireless is ideal for conferences: with automatic frequency management and all-day battery life, it delivers interference-free sound. For large stages, the Axient® series, including the new Axient® Digital PSM, is based on Shure's innovative Wireless Multi-Channel Audio System (WMAS®).

Axient® Digital PSM

Axient® Digital

YAMAHA

CO
commercial audio

AUDIO

Hardly any other company has been as synonymous with music, special sound experiences and first-class sound technology for as long as Yamaha. Both in the field of musical instruments and in event technology.

Yamaha products are used everywhere at major live shows, in concert halls and in theatres. They deliver professional sound for audio conferences and impress with fixed installations of all kinds.

Here you will find headphones and microphones, speakers and complete PA systems, network switches and mixing consoles. We can particularly recommend the DM7 and DM3 consoles. While DM7 impresses with maximum versatility, DM3 is the compact and equally high-quality mixing console solution.

DM3

DM7

CHAINMASTER

THE WORLD OF MOTORS

RIGGING

As a CHAINMASTER reseller, we offer you high-quality chain hoists so that you can fly your rig on any stage without any problems. The manufacturer from Eilenburg in Saxony has been setting the highest standards with its products since 1996 - over 130,000 chain hoists are in use worldwide.

The D8 series impresses with its compactness, low weight and lifting capacities from 500 kg to 3,200 kg. For even greater safety, the D8Plus ULTRA series offers an increased safety factor of 8:1 and is suitable for loads of up to 2,000 kg. All models feature the CHAINMASTER FlipBag chain box and patented slip clutch.

CHAINMASTER also manufactures the CELLMASTER load measuring system: a practical tool to ensure even weight distribution on the rig.

CELLMASTER

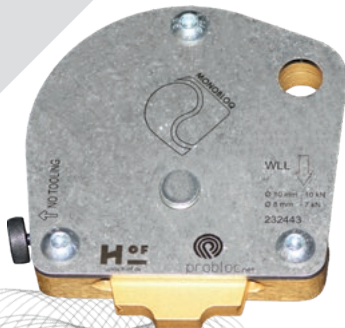

D8Plus ULTRA

The crazier the idea, the better. This sentence perfectly describes the mindset of the German manufacturer HOF. The company has been inspiring people with innovative truss systems and rigging accessories since 1997. We offer you the entire HOF range.

From conventional trusses with various connector systems to the practical MLT Pre Rig Truss and tower systems - HOF covers everything. The Boost your Booth Grid System optimises every exhibition stand. The Monobloq elements create flexible suspension points. And with the XOOP truss, HOF combines the concepts of truss and LED into one product.

SWL

SWL manufactures intelligent control systems for electric chain hoists to ensure that you remain in control at every event. Since 2000, the German company has been developing motor controllers, hand-held control units, adapters and touch remotes, all of which are available for purchase from us.

SWL controllers can control up to 96 chain hoists simultaneously, with motor controllers available in 4-, 8- and 12-channel versions with up to 2.2 kW per channel. Manual control units and touch remotes round off the range. SWL products are also available for hire from NicLen and have already proven themselves on many tours, trade shows and concerts.

One product that stands out in particular is the WR12 radio remote control, which has a range of up to 300 metres on a secure radio frequency and works independently of trade fair WiFi and the like. Ideal for use at exhibitions!

WR12 Wireless Remote

TR96 Touchremote

Cameo has been connecting and empowering 'lumen beings' since 2011. The Adam Hall Group's lighting technology brand offers a wide range of products and Cameo lamps are used by professionals in more than 100 countries. In the theatre and broadcast sector, at events of all kinds and also for architectural lighting. NicLen has been supplying the lamps in large quantities for years.

LIGHTING

With us you get what you need from Cameo. Whether it's the powerful moving lights of the OPUS® series, the weatherproof IP65 models of the OTOS® series or the revolutionary ORON® H2 phosphor laser moving head.

When it comes to static lights, we can recommend the wash lights from the ZENIT® series, especially for façade lighting. The second generation of PIXBAR® LED bars impresses with its sophisticated connection system. And the softlight panels from the S series ensure homogeneous and natural illumination of people and objects.

OTOS® W12

ZENIT® W600

ChamSys

When you buy a ChamSys lighting console, you can rely on robustness, compatibility, connectivity and scalability - the four core philosophies of the manufacturer. ChamSys has been revolutionising lighting control with innovative technologies since 2003.

The MagicQ Stadium series offers powerful consoles for complex applications, while MagicQ Compact and QuickQ are compact and beginner-friendly options for smaller events. Under GeNetix, ChamSys offers DMX and Ethernet-based network solutions.

MagicQ MQ500M+ Stadium

MagicQ MQ70 Compact

SMOKE FACTORY

FOG AND HAZE GENERATORS

As a reseller of the German fog machine manufacturer Smoke Factory, we can offer you premium fog machines for every application, as well as fog fluids and other accessories.

Here you will find classic models from 400 to 3,100 watts, unobtrusive hazers for fine haze and devices for ground fog or impressive CO₂ effects - completely without CO₂. The range also includes wind and mist/wind combinations.

Batteries, radio remote controls, cases and fog fluids round off the range. If you have rented from NicLen, we can send you the required number of canisters directly.

FOG & HAZE

**YOUR
ONE STOP.**

DEFENDER®

The name says it all with DEFENDER®. A product from this Adam Hall Group brand allows you to protect technology, people and the environment at events in equal measure.

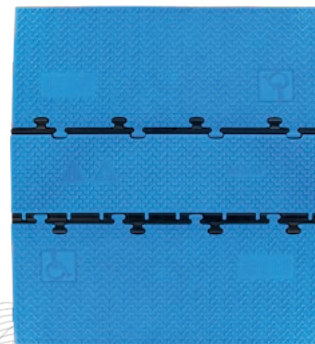

DEFENDER® cable bridge systems have long since become the industry standard. This is because they are sustainably produced from recycled plastic, are extremely durable, can be used flexibly thanks to a modular plug-in system and are super non-slip. We can offer you the entire product range of this brand.

The cable bridges are compatible with power cables as well as water and fire hoses of various sizes. From wide, high bridges to inconspicuous small throw-over models and from cable bridges with one to seven channels of various dimensions, a virtually customised solution is available for every application.

MIDI 5 2D Set Blu

PureLink

When it comes to signal management, the extensive range from PureLink in Rheine, Germany leaves virtually nothing to be desired - from HDMI cables to complex signal distribution. The manufacturer impresses with innovations such as the Ultra Lock System™ and offers fibre optic solutions for the highest demands under the FiberX brand, with loss-free quality, fast transmission speed and simple installation.

The PureTools division includes intelligent solutions for signal transmission (HDMI, DisplayPort, HDBaseT and more), while the PureMounts product concept includes mounting systems for displays, projectors and more.

Payment by instalments made easy - investing with minimal effort.

With abcfinance, you have the option of paying for your investments easily and conveniently in instalments - without high upfront payments. The offer protects your liquidity and makes new purchases uncomplicated and immediate.

Why pay in instalments with abcfinance?

- Flexible terms
- Personal support from financing specialists
- Detailed knowledge of the industry
- More than 45 years of experience

abcfinance will find the ideal financing solution for your needs - whether leasing, rental or hire purchase.

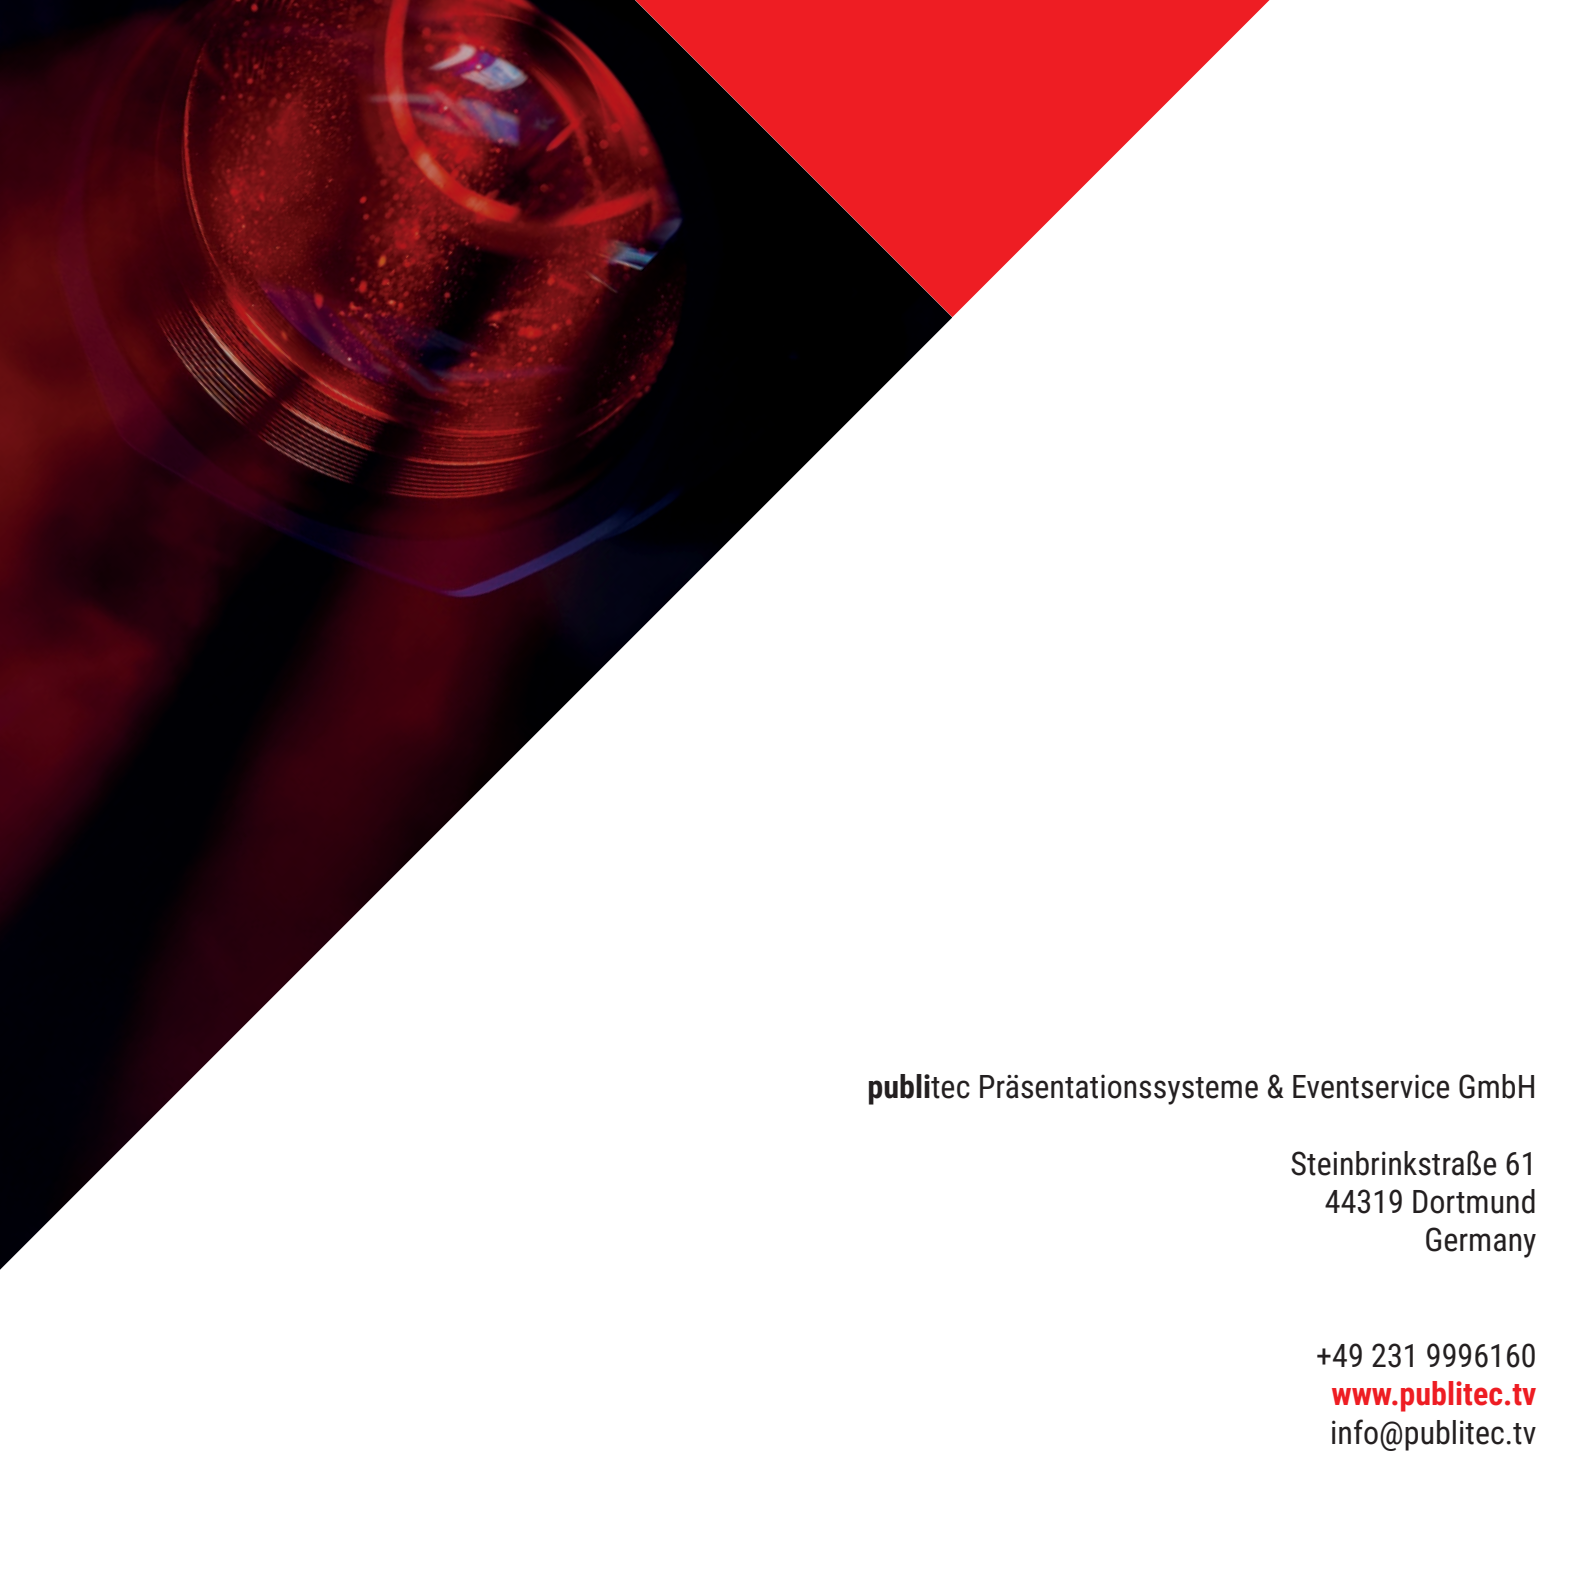

Our service does not end as soon as you have purchased a device from us. Because we continue to support you afterwards - through our tecAID maintenance & repair service! A wide range of lighting, video, sound and rigging equipment is serviced and repaired here every day. Including everything you can buy from us. Whether it's the LED module from Absen, the projector from CHRISTIE®, the audio mixing console from Yamaha or the moving light from Cameo.

The tecAID service technicians can repair your technology at component level and get it back into working order quickly in the event of defects. Or ensure through intensive maintenance that a defect does not occur in the first place. Incidentally, this applies not only to the products you buy from us, but also to all other devices you own.
