

Bb Rack

Bb Rack or “BbR” is a new adaptation of our balancing boxes and it allows us to fit up to any combination of 4 of the hum eliminators into a rack mountable unit.

The creation of the BbR was a direct result of a request from a customer who uses our units regularly and needed a more practical solution for multiple units in the same place. The BbR also gives the units a fixed location, making them easier to find when you need it

At 1U in height, the BbR will fit into most rack mount units, take up very little space and provide you with a simple but effective solution to your audio interface requirements.

As every event is different, the BbR will be tailored to your requirements at the time of purchase. Available combinations are listed below.

Balance in a Rack
